## SECTION 5 – FIRE-FIGHTING MEASURES

**Fire Hazard:** Sodium Hydroxide will react with metals such as Aluminum, tin, and zinc to generate flammable and explosive hydrogen gas.

**Combustion Products:** None known.

**Extinguishing Media:** Dry Chemical, Carbon Dioxide, Water Spray

**Unsuitable Extinguishing Media:** None known.

**Protective Equipment:** Self-contained breathing apparatus {(SCBA), MSHA/NIOSH}. Full protective gear.

**Special Fire Fighting Procedures:** Avoid contact of Sodium Hydroxide with water, as this can produce a violent exothermic reaction. Contact with reactive metals may result in the generation of flammable gas. Evacuate enclosed areas, stay upwind. Closed or confined quarters require self-contained breathing apparatus, positive pressure hose masks or airline masks. Use water spray to cool containers, to flush spills from sources of ignition and to disperse vapors.

## SECTION 6 – ACCIDENTAL RELEASE MEASURES

**Personal Precautions:** Prevent contact with skin or eyes. Personnel cleaning up the spill should wear appropriate personal protective equipment, including respirators if vapor concentrations are high.

**Protective Equipment:** Wear suitable respiratory protective equipment.

**Emergency Procedures:** Remove all sources of ignition and ventilate area. For leaks, stop leak if it can be done safely. Evacuate area and keep unnecessary and unprotected personnel from entering the spill area.

**Environmental Precautions:** Avoid runoff into storm sewers, ditches and waterways.

**Methods for Cleaning Up:** If possible, dike spill and mop or pump into plastic or lacquer lined drums; label “Corrosive” and store away from heat and direct sunlight. Residual may be neutralized with citric acid.

## SECTION 7 – HANDLING AND STORAGE

### Handling

Use entire contents of container, rinse thoroughly and then dispose of container in accordance with the local state or federal regulations.

### Storage

Store at room temperature. Keep container closed when not in use.

**Incompatible Materials:** Acids, metals, explosives, organic compounds and flammable materials. Do not store in containers made from tin, aluminum, zinc and alloys containing these materials.

## SECTION 8 – EXPOSURE CONTROLS / PERSONAL PROTECTION

| <u>Hazardous Chemicals</u> | <u>Exposure Limits</u> |                   |                    |
|----------------------------|------------------------|-------------------|--------------------|

| SODIUM HYDROXIDE           | 2mg/m <sup>3</sup>     | N/A               | 2mg/m <sup>3</sup> |

**Engineering Controls:** A source of running water to flush or wash the eyes and skin in case of contact. Use local exhaust as needed.

**Ventilation:** Local ventilation is adequate. Use only explosion proof ventilation equipment.

**Personal Protective Equipment – Respiratory:** Atmospheric levels should be maintained below established exposure limits. If airborne concentrations exceed those limits, use of a NIOSH approved organic vapor cartridge respirator with full face-piece is recommended. The effectiveness of an air purifying respirator is limited. Use it only for a single short-term exposure. For emergency and other conditions where short term exposure guidelines may be exceeded, use an approved positive pressure self-contained breathing apparatus.

**Personal Protective Equipment – Skin:** Prevent contact with skin. Neoprene/Chemical resistant gloves. Chemical suit, rubber boots.

**Personal Protective Equipment – Eyes:** Chemical safety goggles and/or face shield.
